EARLY LEARNING ACADEMY

flex your brain!

KIDS 360°

EARLY LEARNING ACADEMY

CLOSE WITH WELLNESS

We like to end the day feeling refreshed and with a healthy mindset. We explore ways to calm our bodies and minds through relaxation, yoga moves, and breath work.

INDIVIDUAL TIME

Our teachers strive to learn as much about their students as they can. With small group time, students connect with their teacher in a more personalized way, creating strong and trusting relationships in our classrooms that feel like home.

GET OUTSIDE

Fresh air, sunshine, wind, and playing in the grass are all important pieces of our well-rounded day. Rain or shine, outside time is a must!

MOVE TO INTEGRATE

Taking in information in a FUN way via multiple senses (physically, auditorily, and visually) prepares kids' bodies and minds in a BIG way for kindergarten.

DISCOVER STEAM CENTERS

Naturally curious preschoolers will engage in hands-on activities as they explore and experiment throughout our learning centers. STEAM activities are a perfect way to use their brains to problem-solve.

FUEL THE BRAIN

What we eat affects our brain functioning and energy levels so our organic, kid-friendly lunches are chosen with quality ingredients to fuel kids properly for their day.

START WITH MOVEMENT

A great day starts with children entering the classroom and moving to prime the brain for learning. Exercise improves the brain's potential to absorb new information, creates new neural pathways, and builds strong kids.

JUMP INTO CURRICULUM

Teachers know each student and guide their individual progress and pace in a fun way! Our multisensory curriculum builds the foundation for literacy, number recognition, practical life skills, and lifelong learning.

360° MOVEMENT

Moving our bodies in many ways (against gravity, upside down, and through space) builds balance in the body and brain, strengthening the processing centers of the brain and helping kids learn new concepts.

WE PROMISE THAT EVERY PART OF OUR DAY IS INTENTIONAL IN DESIGN.

Each day, kids will experience purposeful movement in an environment created just for them by educators who teach to their heart and mind.

*a Day
in the
Life*

WHY KIDS 360°

Academic expectations are rising but children's bodies (and brains) are LESS prepared to handle the demands. Kids 360°'s kinesthetic classroom is our science-based solution that primes the brain for learning and leaves kids confident, fit, and prepared for their future.

AGES

Kids 360° Early Learning Academy is for children ages 3, 4, and 5 years old (and potty trained).

INCLUDED

- 2-day, 3-day, and 5-day options
- 9:00 AM to 1:00 PM
- Healthy, nutritious lunch & snacks
- Everyday school supplies
- After school gymnastics, ninja, & dance classes available
